

SAURABH SUDHIR

AI Product Manager

sausud05@gmail.com | +91 78293 91665 | [linkedin.com/in/saurabh0501](https://www.linkedin.com/in/saurabh0501) | [Portfolio](#)

Product Manager with 2+ years shipping 0-to-1 and enterprise products across AI, healthcare logistics, and SaaS in India and the US. Consistently identifies the constraint others miss, frames the choice clearly, and drives alignment on the call that creates the most value. Brings AI product fluency to decisions most PMs defer to engineering, knowing when a given AI approach fits the value proposition and when it does not.

EXPERIENCE

Business Analyst, Product and Delivery

Neetable Technologies

Sep 2024 - Dec 2025 | Bengaluru

Sylvester A.I. AI Pet Health | 0-to-1 | 172+ Countries

- No validated demand signal behind the client's v1 personalisation request. Framed the trade-off explicitly: cut scope and launch lean vs. delay GTM 6-8 weeks; drove alignment on the lean call. Product launched across 172+ countries in under 4 months, approximately 30% ahead of GTM window.

PhoxHealth Healthcare Logistics SaaS | US Client

- Discovery revealed dispatcher overhead was a routing architecture problem, not a UI problem: the radius-based model generated conflicts dispatchers resolved manually each shift. Recommended polygon-based routing; accepted and implemented, reducing dispatcher overhead by approximately 20%.

BGR Mining & Infra Limited Coal Mining Operations Platform | 24/7 Fleet Tracking

- Discovered silent data corruption from connectivity drop-outs causing 3-5 hours of manual audit per shift, a failure mode absent from every requirement document. Framed the case for offline-first architecture, drove alignment before build, and validated across live A/B/C shifts; 100% data integrity across all connectivity conditions.

Skartify B2B Commerce Platform | Vendor Onboarding

- Reframed vendor drop-off as a friction problem, not a missing feature problem. Replaced the multi-step B2B UI with a social-style onboarding flow; approximately 1,000 additional vendors onboarded post-redesign.

Project Manager

Smruthi Technologies

Sep 2023 - Aug 2024 | Bengaluru

- Diagnosed ~20% rework rate across active projects as a scope ambiguity problem, not a delivery problem. Introduced sprint governance and Figma-first scope alignment before build; rework near-eliminated within the first year.
- Managed end-to-end delivery across Apollo Pharmacies, Aarogya Hastha Hospital, and ResGov: requirements, stakeholder alignment, Figma reviews, and developer handoff.
- Recovered all delayed projects within the first year by establishing sprint planning from scratch, moving delivery from ad-hoc to a consistent, predictable cadence.
- Reduced cross-team dependency blockers by introducing a weekly stakeholder sync cadence, improving on-time feature handoffs across all three accounts.

AI PRODUCT PORTFOLIO

Independent work completed through HelloPM AI PM Programme, 2026

Ride-hailing Reliability Analysis | DriveU | Product Analysis | [Portfolio](#)

- Discovery across user segments revealed the reliability problem was post-match, not at matching speed. Reframing the problem to the match-to-pickup window shifted retention recommendations from algorithm improvements to driver commitment signals.

AI-Powered Car Buying Companion | CarDekho | Full PRD | [Live Prototype](#) | [Portfolio](#)

- Identified the core drop-off on India's largest car marketplace as a missing decision signal, not a lack of information. Designed AI Fit Score, Trust Cards, and Decision Nudge triggers. Trade-off: trust model over AI transparency, users needed confidence to act. Monetisation tied to lead-to-action rate rather than passive engagement. Full PRD and working prototype delivered.

Mental Wellness Navigator | Lomiha | Engineer-ready RAG Specification | [Portfolio](#)

- Core product call: no login, no data retention in v1. Trust must precede personalisation for a mental wellness product targeting young professionals. Delivered engineer-ready RAG spec covering retrieval architecture, chunking strategy, system prompt design, and fallback logic.

AI Workflow Practice Platform | Fluent | 0-to-1 | Live Prototype | [tryfluent.netlify.app](#) | [Portfolio](#)

- Primary research (30 professionals, India and Germany): 28 used AI last week, only 3 felt in control. Three barriers identified: cognitive overload from blank-canvas prompting, trust collapse from AI sycophancy, social cost of admitting AI dependence. Scoped MVP to one workflow for one ICP; chose comparison-based output evaluation to remove the blank-canvas failure mode from day one.

EDUCATION AND CERTIFICATIONS

- **M.A. Innovation Design Management** | University of Europe for Applied Sciences, Potsdam, Germany | 2021-2023
- **Diploma (4 yrs) in Interior Architecture and Product Design** | LISAA Bangalore, co-certified LISAA Paris | Bachelor's equivalent | 2016-2020
- **AI for Decision Making** | Wharton Online, University of Pennsylvania | 2024
- **AI Product Management Programme** | HelloPM | Online | 2026

SKILLS

Product Problem discovery, PRD writing, user research, feature prioritisation (RICE, ICE, KANO), trade-off reasoning, backlog management, sprint execution, OKRs, Agile/Scrum, Double Diamond, Value Proposition Canvas

AI/ML AI system design (RAG, agents, agentic workflows, evaluation frameworks), prompt engineering, LLM capability/limitation reasoning, architecture trade-off decisions

Analytics Operational data interpretation, user segmentation, product analytics (funnel analysis, retention metrics), AI evaluation fundamentals

Tools Figma, Miro, Jira, Zoho Sprints, Odoo, Notion, Slack, Lovable, GitHub, n8n
